

COMPANY PROFILE

Zhichengjia Metal Technology (Xiangyang) Co., Ltd.

Cold-forged precision fasteners for automotive, aerospace, electronics, new energy and robotics.

Founded in 2003 in Xiangyang, Hubei, Zhichengjia Metal Technology is a precision fastener manufacturer with a vertically integrated cold-forging campus covering approximately 40,000 m². We operate four global bases across China and Indonesia, ship around 650 million pieces every month, and hold more than 26 lightweight-material patents.

Every product family is produced in-house - tool and die making, cold heading, heat treatment, thread rolling, surface finishing and automated optical inspection. This integration lets us guarantee micron-level precision, automotive-grade quality and full lot traceability, batch after batch.

At a glance: 650M+ pieces / month | 26+ patents | 100+ customers | 4 global bases | 40,000 m² facility | 5 international certifications

Industries served include new energy vehicles, consumer electronics, aerospace, robotics & AI, HPC & AI servers, EMS/electronics and light-alloy die casting. We support non-standard customisation, fast prototypes and application engineering in English, Chinese and more.
